

CHRONIC PAIN TREATMENT CHECKLIST

This checklist may be useful as a means to ensure compliance with these guidelines.

	Hx and Px with assessment of baseline function and pain.
	Review all relevant prior records.
	Has there been a prior unsuccessful attempt to treat with non-opioid modalities?
	Is the diagnosis appropriate for opioid treatment?
	Psychosocial and risk assessment: risk of medication abuse (ORT), psychiatric co-morbidity PHQ-4 or other validated tools, evidence of existing abuse (PDMP).
	Are there co-prescribed drug interaction risks? Benzodiazepines are generally contraindicated.
	Sleep risk assessment (<u>S T O P</u> <u>B A N G</u> or equivalent).
	UDS: Any unexpected results?
	Have you checked the PDMP for prescriptions of which you were unaware?
	Create a treatment plan that emphasizes patient self-management.
	Are there appropriate referrals?
	Have you explored all reasonable non-opioid treatment options: medical, behavioral, physiotherapy, and lifestyle changes?
	Have you considered partnering with a substance abuse treatment program?
	Check women of child-bearing age for pregnancy.
If prescribing opioids, proceed with caution:	
	Obtain a signed Material Risk Notice.
	Establish treatment goals with periodic review of goals over time.
	Monitor compliance (UDSs, pill counts, PDMP, call-backs).
	Monitor improvement in pain and function, including overall well-being.
	Obtain consultation as needed: mental health, substance abuse, pain management, specialty care, pregnant women.

Have you considered partnering with a behavioral health specialist (CBT counselor, peer-to-peer coordinator, Living Well with Chronic Disease facilitator, substance abuse counselor)?
